

Description of the data: The Inventory of landscape features for the conditionality and interventions of the Agricultural Policy (hereinafter referred to as EKRZ) is established for the purpose of implementing interventions of the Common Agricultural Policy of the European Union (CAP). EKRZ is maintained for specific areas of the Republic of Slovenia, where landscape features are important for the preservation of biodiversity and landscape diversity, and their preservation, maintenance, or establishment is encouraged and financed through agricultural policy interventions.

Data acquisition and methodology: Data for the Inventory of Landscape Features is collected using computer-assisted photo interpretation from digital orthophoto images, with satellite imagery to a lesser extent. Field measurements (from ARSKTRP, MKGP, IRSKGLR) and stakeholder submissions also serve as data sources. On average, the Inventory of Landscape Features is updated annually for approximately one-third of the territory of the Republic of Slovenia. Data collection is conducted in accordance with the Rules on register of the record of landscape features for conditionality and Common agricultural policy measures (Official Gazette of the Republic of Slovenia, No. 39/23), Rules on amendments to the Rules on register of the record of landscape features for conditionality and Common agricultural policy measures (Official Gazette of the Republic of Slovenia, No. 24/24), and with the Interpretation Key providing detailed instructions for determining landscape features.

Attributes:

- EKRZ_PID – polygon ID
- RABA_ID – land use type code
- OPIS – description of EKRZ,
- AREA – area in m²,
- DKOP8_OHRA – information if the landscape feature is part of GAEC 8 standard and must be retained,
- DKOP8_4ODS – information if the landscape feature is part of GAEC 8 standard and counts for keeping 4% unproductive features on arable land,
- KOPOP – information if the landscape feature is part AECM sub-measure,
- INVESTICIJ – information if the landscape feature was part of an investment,
- VIR – source
- D_OD – date of last polygon change

RABA_ID attribute code list:

RABA_ID	OPIS
1510	Group of trees and shrubs
1520	Hedgerow
1530	Riparian vegetation
1540	Solitary tree
1550	Trees in line
7010	Small water-body
